

Application No.: 10/669,153

Docket No.: JCLA12271-R

AMENDMENTSIn the Specification

Please amend the paragraph previously added between lines 5 and 6 in page 16 as follows.

--A rear open end of the joint outer ring 1 has an inner diameter larger than an outer diameter of the joint inner ring 2. An inner diameter surface of the cage 3 is a surface having a shape such that a region located forwardly of the center "O" of the fixed type constant velocity joint is capable of controlling the forward movement of the joint inner ring 2 while a region located rearwardly of the center "O" of the fixed type constant velocity joint is capable of allowing the axial movement of the joint inner ring 2.--
